Teachers' Convention To Be Resumed

Redcliff Will Be Convention Centre on November 9th

Believing that the worst of the depression is now over, Hon. Perren Baker has authorized the holding of the teachers' convention again this fall. Last year the convention was cancelled by order of the Minister of Education owing to the poor condition of the province financially.

This year, the teachers of this inspectorate will meet in Medicine Hat and Redcliff on November 9th and 10th, and the two days preceding Remembrance Day which is a Dominion holiday.

On Wednesday afternoon, November 9th, teachers from all parts of the inspectorate will meet in Redcliff to observe how the high school here is operated. On Thursday, November 10th, the principal of the school here will take a specially selected class from Redcliff for demonstration purposes in one of the Medicine Hat schools. All public school rooms will be closed during the two convention days.

Max Schmelling and Mickey Walker are matched for a 15 round bout to take place in New York on Sept. 29th.

At the presbytery of the United Church held in Medicine Hat last Thursday Rev. S. Pike of Eyremore was elected, while man and Rev. R. E. Poy was re-elected secretary for the coming year.

Mr. Bealer met with a nasty accident while engaged at his work as blacksmith at the Glass plant. A small piece of steel hit him in the eye, puncturing the pupil and affecting his sight. Mr. Bealer left for Calgary Monday to consult specialists.

Crops in the Bingley district are turning out much better than was expected. They are running from 22 to 25 bushels to the acre. Cutting is about completed and threshing is now in full swing.

Lethbridge football team defeated the C. P. R. in Calgary last Saturday by 7 goals to 2 in the semi-finals for the Bennett Shield. Lethbridge and Edmonton play the final in Calgary on Saturday.

A new low mark for the season's wheat prices was reached in Winnipeg last Monday. Small sales and the rush of new wheat on the market was the cause. Prices dipped two cents during the day.

Two disastrous explosions in Medicine Hat recently serve as a reminder that familiarity with the use of natural gas is liable to breed both carelessness and thoughtlessness in the use of it. They should also serve as a warning that extra precaution should be taken when leaving a building, to see that all stoves and jets are in safe condition. As the season is now approaching when gas will be more extensively used this precaution is the more important.

Sudden Death of Redcliff Homesteader

Robert Loudon Passed Away At McLeod Sept. 6th

News has been received announcing the sudden death of Mr. Robert Loudon, a pioneer of Redcliff and a former resident of Redcliff.

"Bob" Loudon as he was familiarly known, homesteaded on what is now the townsite of Redcliff and his mother had the homestead adjoining. He came to Canada from Scotland as a young man and engaged in many occupations before taking up a homestead and his many hardships and early experiences, hardships and pleasures during his pioneer days of western Canada, were both entertaining and amusing.

Deceased who was 77 years of age, was a bachelor. He leaves a sister who resides in McLeod. The late Mr. Loudon was one of the best known men of the district.

FLYING HUTCHINSON'S ARE RESCUED

The Hutchinson family were attempting to fly from New York to London, via Greenland, and were thought to have perished as they were not heard from for two days, were rescued off the coast of Greenland Tuesday, by the British trawler Lord Tealbot.

Hutchinsons, aged 8 and 6 years, and four of a crew were in the party and all were alive.

A leaky gas tank forced them in the water of Irtak Ford. Fortunately they struck a reef and were able to wade to shore at an Eskimo village.

While most people look upon this adventure as foolhardy, they will be glad to hear they are safe.

Open season for duck shooting opens today and will remain open for two months.

Churches

ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a. m.

ST. AMBROSE'S, HUBBARD

Rev. Malcolm Steer, Vicar: 9 a. m. Holy Communion. 10 a. m. Sunday School. 1st and 3rd Sundays. 11 a. m. Choral Eucharist. 2nd, 4th and 5th Sundays. 11 a. m. Matins and Sermon. 7:30 p. m. Evensong and sermon.

GORDON MEMORIAL

UNITED CHURCH

Pastor: Rev. R. E. Eakin Pow Sunday, September 18th 10 a. m. Church School. 11:15 a. m. Morning Worship Subject: "Fundamentalism." 3 p. m. Bowel. 7:30 p. m. Evening Worship. Subject: "Christianity and Wealth."

"The vision of God in Christ is the greatest gift in the world."

Installing Automatic Telephone System Here

Will Be In Operation First Of Next Month

Telephone experts are now busy at the local telephone central installing the necessary equipment for the new automatic dial system which is being put in operation here. They expect to have the new system completed and in operation by the first of next month.

The new system will be more up-to-date than the present one and Redcliff is the first town in the province to have this system. When completed it will not be necessary to call central to get your party. This is done by the dial at your own phone.

Here and There

Maintaining his position among the world's great producers of minerals, Canada has won the gold, silver and platinum medals and a third in silver and a fourth in gold.

Mystery cruises, so popular on New York, Montreal and St. Louis, have come to the Pacific Coast, with interest in the "Princess Patricia," of the Canadian Pacific service, which took the first of these cruises recently. The ship had a full sailing list.

The Canadian Open Golf Championship, third of the season, starting nearly in the Royal and Ancient game, will be played on the course of the Royal York Hotel, Toronto, next year, word to that effect having been received by the secretary of the club from the Royal Canadian Golf Association.

Barrenness is a curse of wheat and all sorts of crops and has been in the three western provinces for several years. It is estimated that the loss to the general agricultural department, Canadian Pacific Railway and the Government is \$100,000,000. This result was reached in spite of the fact that the wheat is the most fertile in the world and the soil is the best in the world.

All records for the story of the "big one" that got away were broken recently when a well-known Canadian fisherman, Mr. J. H. Macdonald, of the Victoria Hotel, Vancouver, landed a 100 lb. halibut in the Strait of Georgia. The fish was the largest ever landed in the Strait and the exploit was that of C. Bennett, of the Victoria Hotel at the Strait of Georgia.

Canadians got a thrill recently when Captain A. A. Macdonald, of the Canadian Pacific, landed a 100 lb. halibut in the Strait of Georgia. The fish was the largest ever landed in the Strait and the exploit was that of C. Bennett, of the Victoria Hotel at the Strait of Georgia.

Though the "Princess Patricia" was the first of the Canadian Pacific service, which took the first of these cruises recently. The ship had a full sailing list.

Official and unofficial delegates to the Imperial Commonwealth Conference, which opened in London on September 12th, are expected to arrive in the city from Ottawa were arranged, but the delegates to the Commonwealth Conference have been delayed by the war.

Official and unofficial delegates to the Imperial Commonwealth Conference, which opened in London on September 12th, are expected to arrive in the city from Ottawa were arranged, but the delegates to the Commonwealth Conference have been delayed by the war.

Very Little Business At Town Council

The Meeting Set a Record For Brevity

It took only a few minutes to dispose of all the business which came before the council at its regular meeting last Monday evening.

The secretary reported that there was no correspondence to be presented. This was a record for regular meetings as there is usually a sheet of correspondence to be disposed of.

The several accounts as passed by the financial committee were approved for payment. Several relief accounts were referred to council for investigation. After some discussion it was decided to cut some off relief as they are now working. Other relief grants were reduced. Mr. Prusky was present at the meeting and asked for information regarding the back to the land movement. The secretary was instructed to write the Utilities Board to get their ruling re the town's position in this matter.

HOW TO GET ON MOUNTAIN TOPS

Speaking in Vancouver the other day Rev. S. Lambert, president of the amputation association, said: "If the spirit of the Great War were injected into peace, there might be more peace." Conclusions he said.

"If socks were limited for the destitute as they were limited for the soldiers, and if parcels went to those without food as they were sent overseas, I wonder if we wouldn't have peace today instead of in the valley."

Mrs. C. Raincock, of Penticton, B. C. is visiting her parents, Mr. and Mrs. D. McLaughlin, this week.

The federal parliament is called to assemble on October 6th. The main business of the session will be the consideration and ratification of the trade agreement entered into by Canada at the Imperial Conference.

One of Bill Nussey's fine dray horses took sick and collapsed while dragging the town street sweeper. Loc. Kays says he thinks he will have it in the collar again in a few days.

The C. P. R. timetable will be changed the 25th of this month. No definite information as to the time of arrival here has yet been received but from reports in the Calgary papers it would appear that the westbound train, which now leaves here around one o'clock will not arrive until six in the evening.

It will be greatly regretted by sportsmen throughout the country that Lord Wakefield, sportsman of many attempts to break automobile and motor boat speed records, has decided to take no further part in motor boat speed contests. Miss England, handled by Kay Don was owned by Lord Wakefield.

Ask Council to Call Ratepayers' Meeting

For Purpose of Discussing Town's Financial Affairs

Quite a number of ratepayers met in the armory last Tuesday evening for the purpose of discussing town affairs with special reference to the increase in the tax rate this year.

A. J. Learmonth was chosen as chairman and H. Sangster as secretary of the meeting.

There was considerable discussion and suggestions as to ways and means of reducing the town's liabilities and through this its tax rate during this period of depression.

As nothing concrete was brought forward it was decided on motion of Messrs. H. Dacey and R. S. Hodge, to form a ratepayers' association with the object of formulating some concrete plans to present to the council.

At the close of the meeting a petition requesting the mayor and council to call a ratepayers' meeting for the purpose of going more fully into the town's affairs, was circulated and the required number of names were easily secured.

All-Star Footballers To Go to Drumheller

Will Leave Here Saturday Morning Sept. 24

At a meeting of the supporters of the two town football teams held last Tuesday evening it was decided to accept the invitation to go to Drumheller for a friendly game with the team in that city who just returned home from an extended tour of Canada.

Arrangements were made for the necessary cars to take the players and officers who signified their intention of accompanying them. Any others who are desirous of taking the trip, and those who will have room in their cars should leave their names with Bill Evans at the hotel or at this office and an effort will be made to arrange the necessary accommodation.

This should be a good game as these two teams have already met twice and put up a splendid brand of football, Redcliff winning one game by a 1-0 score and the second was a scoreless draw.

The Bingley mail is now taken from Medicine Hat every Friday afternoon instead of from Suffield. Mr. E. Hanson has the mail contract. Bingley citizens consider this a big improvement in the service as they now get their mail much more up-to-date.

By a gas explosion in Medicine Hat last Sunday, Sam Goble and Charles Parr were so badly burned about the face and hands that they had to be taken to the hospital for treatment. A gas jet in Parr's house had been left open and when the two men entered one it a match to light his pipe.

This caused the explosion which completely wrecked the house.

Encouraging Report From Red Cross Drive

The Baby Clinic is Also Being Well Patronized

A meeting of the local Red Cross Society was held on September 13th.

The report of the annual membership drive which was held in June, was given by the treasurer, Mrs. Cox, and showed \$76.11 collected, with 41 memberships. This was a splendid showing for the year and the thanks of the society is due to all the canvassers who worked so faithfully.

The treasurer was authorized to send \$50.00 towards the support of the Redcliff cot in the junior hospital.

Bills presented showed that relief had been given in emergencies to several families.

The baby clinic, sponsored by the Red Cross, is flourishing, sixteen children having been examined in the recent clinic. It is hoped that the people will continue taking advantage of the services of the nurse and doctor so willingly given.

The box at the bank kept to hold up this work, was opened, over \$50.00 having been given since I was put in. The society is very grateful to all who have found this place for small change.

With winter coming on and the clothing supply very low, the society asks all to remember the Red Cross needs. No special clothing drive will be put on but any people will be called for on receipt of a phone call to any of the officers.

Mr. and Mrs. "Dick" Pickering who have been visiting their sons here in Medicine Hat for the past week, left this morning by motor for their home in Spokane.

A wind storm of cyclonic proportions swept over the northern part of the province yesterday doing considerable damage to telephone lines and property. No deaths are reported.

There is a big demand for harvest help in several sections of Alberta and Saskatchewan. Two autos with five men in each left here for Gull Lake on Tuesday.

W. Paineau, J. Allanbeck, R. Benier, C. and H. Jacobson got a nice catch of fish at twelve Mile Coulee last week-end. In their crews 64 five specimens of valleyed pike which are considered among the finest catch of any of the finny tribe caught in inland waters.

An "arbitrary board" with super-power of direction and control of railway operation, headed by C. P. Fullerton, at present chief commissioner of the board of railway commissioners, is the major recommendation of the Duff Railway commission report, to be presented to the government, in a day or two, according to semi-official information.

WHEAT PRICES TODAY
Winnipeg—1 Northern, cash, 50 1/2; October, 51 1/2; December 52 1/2; May, 57 1/2.
Vancouver — 1 Northern cash 47 1/2.

Wheat Situation

Many Factors Leading To Accumulation Of Heavy World Surplus

The marketing of this year's wheat crop, which is unofficially estimated at from 100 to 450 million bushels, will present a problem of large proportions. In addition to this year's crop there is a carry-over of more than 100 million bushels from last year. This is a reduction from the stocks on hand in Canada a year ago, but world stocks, estimated as at July 1st by the U.S. Department of Agriculture at 690 million bushels against 680 million bushels in 1931, are heavy. Argentina and Australian supplies, as well as Canadian, are smaller than last year, but these decreases are partially offset by an increase of 40 million bushels in the United States.

Conditions in the United States have been unfavorable in the winter wheat area and the outcome of this crop was officially estimated at 120 million bushels as at July 1st against 789 million bushels in 1931, and a five-year average of 749 million bushels. Acreage sown to spring wheat was increased over 1931, and the outlook for this crop is much better. The indicated production of all wheat is placed at 737 million bushels against 844 million bushels last year and a five-year average of 829 million bushels. Domestic requirements practically approach the total wheat crop. Exports from the United States since 1900 have never failed to exceed 115 million bushels a year. These conditions suggest a substantial reduction in United States stocks during the coming crop year.

Crop conditions in Western Europe have been favorable, but unfavorable in the Danube Basin. The total acreage sown to wheat is somewhat less, but for the whole of Europe harvests are expected to be about the same as last year. While wheat production in France, Germany, Spain, Belgium and Holland is estimated at 607 million bushels as compared with 560 million bushels in 1931, the crop in Roumania, Hungary, Bulgaria and Yugoslavia are unofficially placed at 245 million bushels against 264 million bushels a year ago.

Weather has since been reported in Italy and France, but the outlook will be large. The wheat crop in the United Kingdom is officially reported as below average. In Russia, sowings of winter wheat were larger than in 1931-32, but spring operations were beset with difficulty and the total area sown is estimated at 2 million acres less than last year. Production is expected to be about 1,000 million bushels. Home consumption of wheat bread is being encouraged and it is said that it is unlikely that Russia will be able to increase wheat exports. Shipments during the current season to July 23rd have amounted to 71 million bushels as compared with 91 million bushels to the corresponding date last year.

Worldwide surplus has characterized the world wheat situation during the past four years. Available supplies have continued to grow, the crop in 1931-32, after large diversions into lower price outlets, such as increased use as animal feed, heavier consumption in India and greater exports to China. Imports by China in 1931, amounting to 60 million bushels, were the largest on record—eight times greater than in 1930, and four times those of 1929. Canada supplied 19 per cent. of China's imports, United States 18 per cent., and Australia 65 per cent. The bumper wheat crop of 1928 was mainly responsible for the emergence of these huge surplus supplies. Economic depression since 1929 has contributed to the persistence of the problem, but widespread foreign restrictions upon imports have been the major influence tending to hold down total consumption. Russian exports, the outcome of the Soviet policy, have been important during the past two years. Measures of other nations have caused contraction of consumption or restrained the expansion, stimulated home production and increased the burden of the surplus. Since the solu-

tion of the problem of wheat surplus seems to be dependent upon increased consumption rather than upon a general decrease in production, the desired balance may have to await a restoration of a normal state of international trade.—Donald M. Marvin in Royal Bank of Canada News Leader.

Slavery Still Exists

Great Britain Taking The Lead To Stamp Out This Evil

The popular idea is that there is little or no slavery left in the world in these days. Most people imagine that slavery was abolished many years ago. But that is quite a fallacy, and the fact that 100 years have passed away since slavery was abolished in the British Dominion prompts reflection upon the immense task that remains to be overtaken before slavery is stamped out all over the world and no man or woman is in physical thralldom to another.

A recent decision of the League of Nations to pursue a relentless campaign against the continuance of slavery anywhere in the world is said to involve the ultimate freeing of 1,000,000 slaves in the Asiatic and African continents. Sir George, Governor of Sierra Leone, has declared that slave raiding is as horrid as today as it ever was. Missionaries try to practice that accompany the owning of slaves in some parts of the world, notably the interior of Africa, to "convert to death," "selling off being poured down slave throats," and "branding them with red hot irons." Slavery in various countries exists today in China, Arabia, Liberia and Algiers. In China, especially, there is hope that public opinion will bring about the abolition of the practice of the owning of slave girls. But there is a great deal of effort needed before present-day slavery is utterly abolished. In some cases slavery is embedded in the customs of the countries implicated, and to overcome conservatism will need to be necessary—no light task.

It is encouraging to know that Great Britain has taken the lead in the effort to stamp out this evil, an evil so obvious that it cannot be contemplated with anything but repugnance by any modern civilized person. Every nation has agreed to join hands in the effort. Surely every man or woman with influence in the world as it will cause that influence in this noble cause and the voice of popular approval be heard on behalf of the laborers of the world to uphold this age-old approach to humanity.—Regina Leader-Post.

Proposal To Divert Northern Rivers

Channel Of Ogoki River In Ontario May Be Changed

The proposal to divert the waters of the Ogoki River from their natural channel leading to the sea at James Bay into another route which will flow into the Great Lakes by way of the Nipigon River, has because of its unusual and spectacular nature, received much public attention. The project has been estimated at some 200,000. The horsepower to be made available is not, however, at the present time an important item because there is no pressing need in that direction. Northern Ontario has so much potential electric power now "underfoot" of 4,000 cubic feet per second to the waters of the Great Lakes will be important because of its effect in maintaining levels which would be in danger by the deepening of channels at once means heavier outflow.

Releasing a pigeon from an aeroplane, policemen of Frankfurt-on-Main, Germany, followed the bird and located the neighborhood of a mail carrier who had demanded a large sum from a member of the consular service. The pigeon had been sent in a box with a blackening note so that it could carry back the money. On the return of the bird the blackmailer wrote the consular threatening letter. He was traced definitely by it, and now is serving a term in prison.

An instrument has been invented that measures to the 1,000,000ths of an inch it should be useful to a motorist trying to find a place to park his car.

In San Martin, oldest and smallest republic in the world, no clock strikes more than six consecutive times, due to the fact that the day is divided into four parts of six hours each.

FAMILY TO ATTEMPT OCEAN HOP

Scientists Get Thrills

Father Hubbard and Party Explore Active Crater/Bed

After conquering Aniakchak, the largest active crater in the world with its circumference of 21 miles and a drop of 8,000 feet from rim to floor, to return with an official record of the highest crater bed temperature known to man, Rev. Father Bernard R. Hubbard, S.J., cleric priest of Santa Clara University, arrived recently in Victoria after five months of scientific exploration packed with thrills and incident. With him were Professor Rod, Chisholm, cartographer of San Francisco University, and "Margo" and "Kaiapa," malamute dogs sharing their adventure.

Father Hubbard gave a summary of the remarkable results of the 1932 expedition from Santa Clara University of California, paying full tribute to Father Galtier, S.J., Rod Chisholm, Kenneth Chisholm, and Edward Lewis of his immediate party and others who had helped in the work.

Father Hubbard guided the Santa Clara party to the scene of its greatest success. Inside the crater, where 3,000 feet below its rim the party found temperatures high enough to melt tin, zinc and copper by remaining at a hole twelve inches deep in the bed of ashes. Copper has a melting point of 2,000 degrees and zinc, 1,700. The party was successful in using copper wire and a dial within a few minutes. Nearly issued blue vapors, indicating temperatures still higher, possibly over 2,000 degrees.

It was at Aniakchak that Father Hubbard showed his party the new furnace which he had predicted in 1931 for this season. Three miles in ascent, the fumarole from the most recent eruption was still yawning on the floor of the main crater, with its deadly ring of gases inside. Two hours were spent in exploring the furnace, hours being hung with masses from the poisonous fumes, the party taking exhibits and samples of sulfur and other minerals for analysis.

While inside the crater the party had braved death many times from chloride, sulphur dioxide and other gases, but never arrived there by new birds, trapped by the deadly fumes. One malamute became overcome and was rescued with nothing more serious than a wound to his foot. Due to the insulating bed of ashes, crater beds were passable, but a few inches below the surface temperature as high as 600 degrees centigrade were common, while copper fusing was at only one foot below ground.

More Automobiles On Canadian Farms

Station Shift Number Has Doubled In Ten Years

Automobiles on farms in Canada have doubled in the past 10 years and there is now a car for every 2.27 farms, figures issued by the Dominion Bureau of Statistics show. There are 728,623 farms in the Dominion and on them, 221,300 automobiles.

Ontario has more cars to the farm than any other province, with an average of one for every 1.73 farms, and Quebec has the smallest ratio, with one for every 1,108 farms. In Saskatchewan rural Ontario, with one in 2.10; Manitoba, 2.12; Alberta, 2.28; British Columbia, 2.46; New Brunswick, 2.54; Prince Edward Island, 3.21; and Nova Scotia, 3.82.

The number of farms with tractors in Canada has increased from 43,578 in 1921 to 97,176 in 1931, an increase of 123 per cent. Similarly, the number of tractors has increased from 48,400 to 100,000 for an increase of 124 per cent. in the same period.

There is one tractor for every 1.69 farms and one threshing machine for every 9.64 farms in Canada.

Fencing Paper Money

Paper money is now printed from chromium surfaced plates. The design is first engraved on a steel plate, from which a negative is made by depositing electrically first nickel, and then alternate layers of copper and nickel. This negative serves as a stamp upon which an electrolytic plating plate is deposited. This plate is plated with chromium, and duplicates the original steel engraving.

Like—My wife explored my pockets last night.

Mike—What did she get?

Like—Same as any other explorer—enough material for a lecture.

Even in 1900 B.C. they used bath towels. This is borne out in findings in an Egyptian tomb by an expedition of the Metropolitan Museum of Art.

Waterproof rope, made by treatment of rubber, is being turned out by a process developed in England.

A New Market For Flax

Ireland May Get Supply From Canada

Canada may become a serious competitor with Russia in the sale of flax to Ireland, says the Hamilton Spectator. Lewis & Clark, of the Northern Ireland delegation to the Economic Conference, visited the flax-growing district in Ontario in accordance with the possibilities of the Canadian product. Flax for fibre has been cultivated in Canada since the first days of New France. It is grown by the Doukhobors of the West, who learned the art of its cultivation and harvesting in Russia. It has been grown successfully in Nova Scotia and New Brunswick, has been shipped to Ireland from Quebec, and flax seed sold in that country by Ontario.

Most of the Canadian flax is grown in Western Ontario, hence the visit to Ory to that district. The flax-growers there, however, addressed the growers there. Result of the discussions which will result Ireland and Canada may mutually benefit. The reason why flax has not been grown more extensively in this country is the problem of processes required to prepare the flax for spinning which makes the flax very high. The Russian peasant has the advantage, perhaps, but it seems that can be sold in Ireland as it has been, it is hard to see why the trade cannot be extended. The quality of Canadian flax is good, energy, initiative and good management on the part of the Ontario grower may enable him to compete successfully with the flax of Russia. Opportunity would seem to be knocking on the door of the Canadian flax-grower.

Fine Salvage Fleet

Loose River Working On "Laurentine"

Much admiration was expressed over the great feat of the Italian salvage crew in winning many millions of dollars worth of bullion from the British liner, "Egypt," off the French coast, and another feat is being performed off the coast of Ireland by a loss diver, which is equally worthy of praise.

The White Star liner "Laurentine" was torpedoed by a German U-boat in 1917, and sank in 120 feet of water. The British Admiralty, with all the equipment salvaged of twenty-five million dollars worth of gold, then gave up the job in 1918, leaving another million dollars to be lost.

About one year ago a small syndicate of Londoners hired a tug more than sixty years old, a small crew and one diver. The water is always rough, there is a constant eddy at the bottom which has made the sand as hard as concrete, and it is only possible to stay down a few minutes at a time. The rough eddy shifts the wreckage, so that the diver has to grope about for his bearings a different way every second. The preparatory work that he has done one trip may be undone by the time he is able to go down again.

But recently he salvaged a gold ingot worth 100,000.

It is a hard struggle, but the reward is high—St. Thomas Times-Journal.

Danger In Old Tires

"A blowout on the front tire of an old model coupe on the Kingston road resulted in one person being killed and six injured." That is not uncommon story. It is dangerous to go at high speed with wornout tires and it is difficult to go at other than high speed on the highways. Tires are cheaper and old motorists use it as a duty not only to themselves but to their passengers to make sure that they are in serviceable condition.

Making Proomed Cheese

The annual "processed" cheese manufactured in Canada last year amounted to 12,042,012 pounds, of which 1,163,138 pounds were exported. There are eight firms now producing this type of cheese, of these six are in Ontario, one in Quebec and one in Alberta. "Processed" cheese is made from ordinary Cheddar. —Department of Agriculture, Ottawa.

The New Television

This is a wonderful apparatus, you can see how your drafts for outstanding debts are going—Loring Magazine, Berlin.

FANCIFUL FABLES

WE'RE CLOSING UP NOW, MISTER, BUT JUST TURN DOWN THE PAGE AT YOUR PLACE.

—Ed. Geo. Brown, Editor of New York Age, August 8, 1932

WORLD HAPPENINGS
BRIEFLY TOLD

The will of the late King C. Gillette, safety razor manufacturer, naming his widow as the sole beneficiary was probated at Los Angeles. Attorneys said the estate would be in excess of \$1,000,000.

Believed to be the last survivor of the Sixth Regiment, which took part in the Riel rebellion at Cut Knife Creek and Fish Creek in 1885, Sergeant-Major Uesbe Beaudoin, 66, is dead at Lachine, Que.

Two thousand five hundred dollars for an individual prize for the best sample of wheat shown at the World's Grain Exhibition next year at Regina, is the largest of its kind ever offered.

Final payment to farmers for all wheat pooled during the 1921-22 season has been made by the Alberta Wheat pool, it was announced by H. D. Purdy, general manager. Total payment amounted approximately to \$200,000.

Automobiles on farms in Canada have doubled in the past year and there is now a car for every 2.27 farms, figures issued by the Dominion Bureau of Statistics show. There are 726,022 farms in the Dominion and 1,623,305 automobiles.

There are 5,261,411 single persons in Canada and 3,971,198 married, it is revealed in census figures on conjugal conditions released by the Dominion Bureau of Statistics. Of the population of 10,570,760, males number 5,371,451 and females 5,202,345.

Preserving Fish By

Brine-Freezing Method

Process Used in Scotland Has Been Gratifying Success

Brine-freezing, a new method of preserving fish caught in the sea, the result of research work carried out at the Torry Research Station, Aberdeen, is regarded as a gratifying success and an exhibition of cod, sole, halibut, plaice and rock salmon frozen by this process was given priority at the Department of Scientific and Industrial Research, London.

The fish had been caught by the research vessel "City of Edinburgh" weeks previously. Some of them were fried at the department and guests enjoyed an early luncheon of fried fish at the government's expense.

This new process will, it is claimed, revolutionize the methods of preserving fish. Trawlers will brine-freeze fish as they are caught instead of, as at present, storing them in ice while the trawler is at sea. A Lumley, superintendent of the Torry Station, said that one of the disadvantages of fish frozen under old methods had been that it was not ultimately nice to eat.

In the brine-freezing process the fish are dipped into a solution of sodium chloride (or brine) carried on board in a tank at a temperature of five degrees Fahrenheit. Then they are stored at a temperature of five degrees, and experiments have shown that fish so treated can be kept in perfect condition for three months.

The cost of installing the new plant on board is about \$20,000, but it is claimed there would be a real saving, because of the avoidance of loss on fish caught early in the voyage. A Billingsgate fish merchant says the brine-frozen fish was almost as good as freshly caught fish.

Locked Vision

Hotel Proprietor—"Now, over there is the sea."

Copy Writer—"Where? I can't see it."

Hotel Proprietor—"You can't." My dear sir, I'm afraid you're not the man we want to write our advertisements.

Another Scotchman died as a result of a broken heart in Edinburgh last week. It seems that his doctor insisted that he give up smoking just after he had had his cigarette lighter refilled.

An Important Industry

Demand For Lobsters From Canadian Waters Is Growing

The lowly lobster has climbed to a high place of importance among Canadian industries and offers one of the brightest spots on the Dominion's business horizon, according to a bulletin just released by the Department of Immigration and Colonization of the Canadian Pacific Railway.

"Both in the United States and Great Britain, demand for lobsters from Canadian waters has been growing and the industry is in a healthy state," the bulletin stated. "Lobsters now are second only to salmon as the most important fishing enterprise in Canada, the salmon industry being centered largely in British Columbia and the lobsters coming chiefly from the Atlantic coast near Halifax, N.S."

The bulletin told of a new record for a single shipment of canned lobsters which recently was made to Great Britain. The shipment contained 10,000 cases and was valued at \$100,000.

Novel Use For 'Planes

Japanese Army Machines Search For Active Volcano

Japanese army planes were put to the novel use of scouting for an active volcano. Reports came to Harbin that an 'active' volcano in the Hinggan range to the west had suddenly become active. Rumblings were reported as heard in a place 25 miles away from Harbin. The 'planes failed to locate any evidence of eruption. Russian scientists reported 15 volcanoes in the Hinggan range back in 1880.

Eliminating Noise

Milk Concern In New York Is Doing Its Bit

A large milk concern serving New York City has actively entered upon a noise abatement campaign. By equipping its horses with rubber cushions for their shoes and providing its drivers' milk bottle baskets with rubber shock-absorbers, it plans to lessen the din of early morning milk deliveries.

A neocropolis is a rural ground, usually of great size, or one found near the site of an ancient city.

NEW DEEP WATER ROUTE FOR WESTERN WHEAT

Most fittingly, the vital new link in the Great Lakes' system, Canada's \$120,000,000 new Welland Canal, was opened, officially, by sending the greatest grain-raider afloat, S.S. Lemoyne of Canada Steamship Lines, through the tight locks to Kingston with the biggest cargo of western wheat moved

"Look here, young man, I engaged you as a billing clerk, not a cooling."—From London Opinion, England.

Utilize White Whales

Hidden May Be Used For Manufacture Of Fancy Leather Goods

The two white whales brought to Winnipeg from Hudson Bay by the Industrial Development Board of Manitoba have been rendered at the St. Boniface abattoir and they provided 35 per cent. of their total weight in excellent quality oil, bearing a slight odor, and being only slightly stronger than olive oil. The board hopes to develop a new industry on the northern water body.

The hides are now in process of tanning which will take some time, but leather workers believe it will prove suitable for the manufacture of ladies' handbags, and other fancy leather goods. Minute study of the outer skin reveals a mottled effect with alternating patches of smooth and rough skin. Rubber almost two inches thick adheres to the hide, but comes off readily.

"What did the old man say when you asked him if you could marry his daughter?"

"Asked me if I could support him in the same style she did."

Human Province, China, is producing one-third of the antimony mined in the world.

A Token Of Gratitude

German Soldier Pays Tribute To Humanity Of American Doughboy

A little silver coin braced to commemorate the humanity of an unknown "doughboy" who saved the life of his enemy was recently deposited in America's war museum at West Point.

August Ulrich, late of the Kaiser's army, sent the tribute from his death-bed and with it this note: "Before I will have to depart, I intend to fulfill the promise I gave to a soldier of the American army, who saved my life in 1918."

"I therefore say in your hands a bracelet made out of old German coins as a sign of appreciation for a nation whose soldiers even in war treated their enemies with great consideration."

Electrically heated bottles for the production of early vegetables are coming into vogue in Canada, notably in installations to be found in Quebec, Ontario, Manitoba and British Columbia.

A compact and modernistic piano designed for apartments, has a keyboard and pedals which fold up, thus saving a plain chest-shaped piece of furniture.

OPENED BY WORLD'S GREATEST GRAIN VESSEL

In two years, a load of grain over 150,000 bushels greater than had ever been shipped through the lower lakes in history. The Governor-General, delegates to the Imperial Conference, Rt. Hon. R. B. Bennett and members of the Cabinet all attended the opening ceremonies at Thorold.

A Big Cargo

Lake Vessel Carries Enough Wheat To Bake 12,555,600 Loaves

An old salt sat on the bank of the new Welland Canal. Beside him sat the statistician. "Talk veered uncertainly from one subject to another. Then it reached record cargoes. "And the statistician got busy."

When the "Lemoyne" opened the canal, she carried the world's greatest cargo of grain, he said. "She has already carried 571,885 bushels of wheat at one load, and that cargo would make 12,555,600 two-pound loaves of bread. If you laid those loaves end to end they would reach 2,350 miles for the distance from the spot where the wheat was produced to the sea. It would take 210 farms of 10 acres to grow the cargo and 280,000-ton railroad cars, or a train 2½ miles long to carry it."

"Well," said the old salt, tapping his pipe reflectively against the stubbing post, "that's quite a load. I remember when the first steamboat—'Theerin'—pulled out of Port Arthur with her record cargo. It was 30,000 bushels."

Britain Perfects Super-Tanks

Much Stronger and More Efficient Than Old Type

Great Britain was the first nation to use "hulls" in warfare. Since then these instruments of destruction have been greatly improved so that England leads the world in such weapons.

The latest tanks are covered with armour plate much stronger than before and capable of resisting even the new German super-bullet, which blasts its way through the armour of the old-type tanks. They have also perfected a more mobile light tank capable of negotiating ditches, streams, trenches and other gaps which their predecessors could have negotiated.

What It Stood For

A tiny butcher shop recently opened in a Connecticut town; wedged into a small store room, bears the impressive firm name of Williams & Gilchrist, Ltd. Asked what the Ltd. stood for, "Stand for 'limited,'" Mr. Gilchrist said. "You see, we're limited to meat and nothing but meats."

"What's a paradox, Mister?"

"Two wharfs side by side, sir."

Vast Wool Trade

Three-Fifths Of The World's Wool Produced in British Empire

Nearly one-half of the world's raw wool, a survey by the Empire Marketing Board shows, and more than two-thirds of the wool exported abroad, is produced within the British Empire.

Concerning Canadian production, the survey, a portly volume of 200 pages, says that appreciable progress has been made since 1914, though the high point reached just after the war has not since been attained. The sheep population is increasing steadily, and there is no reason to doubt a slow upward trend in wool production. Quebec and Ontario together are responsible for about one-half the Canadian clip, but their share has been gradually diminishing, with that of the Western Provinces increasing. "The sheep population of the world is estimated at nearly 800,000,000, of which about one-third are in the Empire."

Recipes For This Week

(By Betty Barclay)

FIN WHEEL BISCUITS

2 cups special cake flour, sifted.
4 teaspoons baking powder.
¼ cup cream salt.
4 tablespoons butter or other shortening.
½ cup milk.
1 tablespoon butter, creamed.
½ cup brown sugar.
½ cup pecan meats, chopped.
1 egg, beaten.
Add baking powder and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Roll ½ inch thick on slightly floured board. Spread with creamed butter; sprinkle with brown sugar and nuts. Roll as for jelly roll and cut in 1-inch pieces. Place in greased muffin pans cut-side up. Bake in moderate oven (375 degrees Fahrenheit) 20 minutes. Makes 12 biscuits.

ORANGE BLANC MANGE

Serves 8-10.
1½ cups evaporated milk.
¼ cup sugar.
¼ teaspoon salt.
4 tablespoons cornstarch.
1½ cups orange juice.
1 teaspoon grated orange rind.
Beat eggs in double boiler. Mix sugar, salt and cornstarch. Blend with part of orange juice. Blend with remaining juice to hot milk. Add grated rind. Cook until smooth, stirring frequently. If orange juice curdles milk, beat with white type heater. Pour into individual serving dishes and chill. If desired to mold, increase cornstarch 1 tablespoon.

Settlement Plan

Saskatchewan Families Taking Advantage Of Government Scheme

Out of 567 families approved for the Saskatchewan Government land settlement scheme a total of 318 had actually gone to farms up to August 6, according to a statement issued recently.

Further classification of this number showed that 125 families had gone to make their own purchases and 193 on homesteaded lands.

Figures for the cities were: Regina, number approved 194, actually gone 85; Saskatoon, number approved 298, actually gone 172; Moose Jaw, number approved 73, actually gone 58.

Origin of other families included in the settlement movement were: Arcola, 1; Yorkton, 1; Estevan, 20; Cupar, 1; Indian Head, 1; Edmondville, 1; Vonda, 1; Sutherland, 4; Wynburn, 5; Gravelburg, 1.

Trials Of A Newspaper

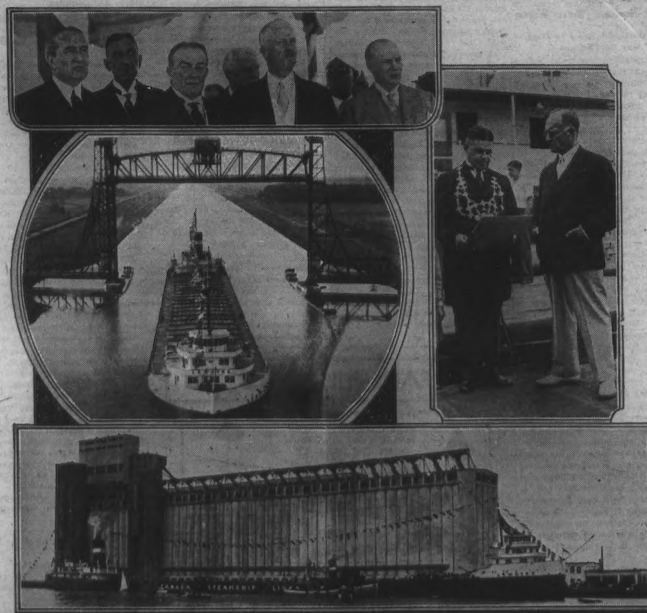

The following item appeared in The Journal, Bates County, Georgia: "We have a good business Saturday. Junked type that cost 50, put in \$40 worth of new type and collected \$1 subscription. We tried 'em on corn last week, but had little success. This week we call for peanuts on subscription. This is after as we are going. Don't want any hickory nuts."

An unwelcome guest is one of the best things going.

"Can't you give up drinking for my sake?"

"Who said I drank for your sake?"

"All for Alla, Stockholm."

Photos show: top left: Rt. Hon. Stanley Bruce, of Australia; Rt. Hon. Stanley Baldwin; His Excellency, Earl Beesborough, and Rt. Hon. R. B. Bennett with members of the Indian delegation at the canal ceremonies. Left centre: the giant 445-foot S.S. Lemoyne passing under one of the canal 120-foot electric lift bridges. Right centre: marking the inauguration of a new eastern deep water terminus for grain at Kingston and the fact that only 200 miles of river navigation now remain to reach the export port of Montreal—Mayor G. G. Wright, of Kingston, conferring the freedom of the city on W. H. Coverdale, president of Canada Steamship Lines aboard the freighter on arrival. Bottom: "The practical consummation" of the ceremony—S.S. Lemoyne prepares to unload her cargo of 132,000 bushels, shipped by James Richardson & Sons, of Winnipeg, at Kingston's new elevator which has already, for 1932, handled 4,000,000 more bushels than it did in the whole of the preceding year.—All photographs by Canada Steamship Lines.

"What would you like, sir?"
"One ham and three steaks."
—Burr Hunter, Madrid.

"WOMEN CAN BE CHARMING AT ALMOST ANY AGE"

says Frances Starr

"Of course I am 39," says Frances Starr, famous stage and screen star. "You matter so little nowadays. If a woman knows how to guard her complexion, however."

"Every actress knows that regular use with Lux Toilet Soap will do wonders for her skin. I use it regularly."

(Of the 404 important Hollywood actresses, including all stars, 380 use this fragrant white soap. You will want to try it—at just 10¢ a cake)

"m30"

A Matter Of Honor

Memoir Of Tendency To Disregard Bona Fide Obligations

A prominent "educationalist" has written a new touching, readable and debt. The thought rushed in his mind is whether agitation such as we have today about the existing order may conceivably induce the kind of debtors unable to meet their debts, such disregard or bona fide obligations as to carry a memo to simple honor.

There appear, unfortunately, some debtors who have adopted a defiant attitude towards their creditors, who say, in effect, "Collect if you can"—men to whom taxes and other ordinary obligations are something to be treated with contempt. It would be a sorry day for Canada if any such attitude were to become widespread. Debt is not something to be treated with disdain, to be escaped if possible. Were any such attitude to become general in this country, Canada would be in for a great moral injury. One of the veritable bulwarks of any sound society is the honor of its people, individually as well as collectively. The rank and file of Canadians must be men and women of honor if Canada is to be great. "A debt is a matter involving personal probity, and while it may be impossible to meet it on occasions, the obligation is not due to be lightly waived. No 'array of paper' philosophy must enter into the outlook of the Canadian people."

Here again we can learn from the pioneers. Many of the early citizens of Canada took their obligations with the utmost seriousness, and no good any man with a spark of moral sense, his being. There is recalled a former Ontario citizen with whom the payment of taxes was almost a passion. He hardly raised right until his taxes were paid. He always attended to this matter promptly, and out of recognition of it as a prime responsibility. The question is, in this splendid conception of things apt to be engendered and swept away under the rays of certain expediency and expediency. Not all legislators against present conditions by any means (contentment disgraced of debt), but there are some who, willingly and uninvitingly, create in the public mind a feeling that the State and one's fellows can legitimately be "cheated"—Regina Leader-Post.

Canadian Cattle Exports

Exports of live cattle to foreign markets up to the end of June 1932, totalled an increase of 898 over the total shipped in the first six months of 1931. The prospect is that shipments in the next few months will show a greater increase over the corresponding period last year.

Flax grown for fiber is a very different type from flax grown for seed.

British firm cannot reject 40 ships in the last year.

France Takes To Tea

Imports Of Tea Have Doubled Since 1929

Just why it is we are at a loss to understand, but apparently France is taking to tea. Perhaps it is the depression, perhaps it is a concession to the British perfidiousity, perhaps it is an attempt to win France's part to prove that even without prohibition people can still drink something other than alcoholic beverages. Whatever it is, France is taking to tea and since 1929 its imports of this innocuous beverage have doubled.

This does not mean, of course, that overnight tea has become the Frenchman's favorite drink. Even with imports doubled France has a long way to go before its consumption of tea catches up with that of the United States, Russia or Holland, to say nothing of England and the British Dominions. Yet the sudden jump may indicate a change in national habit, it may foreshadow a trend. We may see the day when it is tea and not beer, an aperitif or even a cake and a glass of tea in the favorite order at the sidewalk cafe of Paris.

But second thought we are not sure of this. For the same point which brings the announcement that French consumption of tea has doubled in the past two years also describes the celebrations in Rheims and Eprenay on the anniversary of the first bottling of champagne. It was two hundred and fifty years ago that a certain Dom Perignon put the first bubbles into the still wines of the Champagne, and so long as France celebrates the occasion one worth celebrating, we need not fear that tea will drive out French wine. It may now be possible to get tea in Paris where formerly it was considered an outlandish beverage not fit to be served at a disesteeming patron, but we rather imagine that for a long time to come it will be possible to hold either drink as well—New York Evening Post.

Mediterranean Fleet

Inspected By Prince

First Official Visit Of His Most Excellent Majesty King George VI

His Majesty King George VI, accompanied by the Prince of Wales, made his first official visit to the fleet at sea, when he visited the Mediterranean fleet, under the command of Admiral Sir Robert Carr, at Corfu, on August 13.

An avic-shir and a personal naval aide-de-camp to the King, the Prince accompanied his father when the majesty visited the home fleet at Weymouth in July, and he has inspected many warships during his travels abroad.

"Some people have mastered the art of getting on without working," says a writer. "I've mastered the art of working without getting rich."

The windmill blades of an English auto can be folded up to allow easy storage.

Super-Station For Empire Broadcasting

Plans Completed For Giant Station Of Super-Station For Empire Broadcasting

The British Government has had in mind a long time a station that will broadcast programmes from the Motherland to all parts of the Empire, Music and talks by eminent Britishers would be provided for. Now, an announcement from London says, plans are complete for a super-station to meet the Empire's needs.

The British Empire is so far-flung that the sun never sets upon it, the necessity arises to have a plant that will reach to the furthest corners of the earth and at any hour of the twenty-four, because when the sun is shining in Canada the moon is shining in Australia and the tides there are abed.

The new station at Duntreath will be a giant affair of stupendous power to overcome all the obstacles to thousands of miles of broadcasting in all kinds of weather and climatic conditions. It will have seventeen different aerials, eleven of them directional, to facilitate rapid change from one wave to another.

When it is ready, agreements, which even now are being negotiated, will be completed with the various overseas broadcasting stations to accept a regular service of British programmes every day.—St. Thomas Times-Journal.

THE RHYMING OPTIMIST

By Alice Michalco

WHAT A FRIEND SAYS

"This is what friend says:
When a home has gone:
"Better day tomorrow!
"Darker before dawn!"
"Gird yourself with courage!
"Arm yourself with trust."
"You are proud in spirit!
"Conquer, as you must!"

"This is what friend says:
"Victory, oh, we are near!
"But my love is constant,
"And my dream is true."
"You will be the victor
"Of the world to come."
"Promise to keep trying,
"Just to please a friend!"

Friends can give fresh strength,
"Better drink to that;
"And my dream is true."
"It is man's stoutest staff."

Silk Flag Pays Rent

Wellington's Successors Have Observed a Custom For Hundred Years

By handing to the King at Windsor a small silk flag, the Duke of Wellington paid one of the strangest annual rents in the world. After Wellington's famous victory at Waterloo the Government presented the Duke with a small flag of St. Michael's, in Hampshire.

The conditions of the grant were that the anniversary of the battle of the Duke and his successors should hand the reigning monarch a ribbon flag in remembrance of the victory and for more than 100 years successive dukes have paid the tribute.

When the King received the flag from the Duke, it was hung in accordance with custom, over the bust of the first duke in Windsor Castle guardroom.

Addition To London Zoo

Catapulted From Algeria Is Not Strong On Looks

An Algerian centipede, recently received at the London Zoo, is a horrible-looking creature, nearly six inches in length with a narrow, worm-like body divided into joint on or twelve inches in length. It has a pair of legs attached a pair of legs of a bright orange-yellow. It has two small black spots on its head. Not only has the centipede more than twenty legs, each of which leaves a poisonous trail behind it as it passes over human skin, but it is also armed with fangs just as sharp as those of the scorpion. If it is attacked this little creature puts out an evil-smelling fluid as a protection. In the tropics centipedes are great danger, and are as dangerous as certain poisonous snakes.

Drying A Bearskin

A budding American pianist had just played at a small German court. The Master of Ceremonies asked him whether he would like to have a decoration or a hundred marks. The pianist asked:
"How much is the decoration worth?"
"About fifteen marks."
"After considering a moment the pianist decided:
"Then please give me the decoration and 35 marks!"

Short Wave Communication

Marconi Success In Sending Ultra Short Radio Waves

Guglielmo Marconi has announced that he had finally succeeded in "bending" ultra short radio waves so that he will be able to utilize his sweet means of communication at longer distance than was previously possible. Because heretofore he was unable to transmit through obstacles.

His latest perfection has enabled him to overcome the earth's curvature, which is proof, he said, that ultra short waves are not definitely limited by all obstacles.

The messages were sent from Rio de Janeiro to Lima, to Cape of Good Hope in South Africa, to Cape of Good Hope in South Africa, to Cape of Good Hope in South Africa.

Associates attributed great importance to the discovery because heretofore Senator Marconi had found ultra short wave communication only between two points in a line of sight. If there were intervening obstacles, such as houses, trees, or waves, they failed to pass. He has therefore been seeking for the past year to "bend" the waves and according to the announcement, finally succeeded in doing it Saturday, August 13.

Experts here said the discovery would greatly extend the possibilities of ultra short wave communications.

Buys More Timber

Frank J. D. Barnum Adds To His Holdings In B.C.

Adding to his already large holding of Big Tree, Prince of Wales, and Mount and Annapolis Royal, N.S., has completed the purchase of an additional 248 acres of giant Douglas-fir trees on Vancouver Island, it is announced.

For many years Mr. Barnum has been interested in the preservation of timber for the benefit of present and future generations and the recent purchase of giant fir will join his other holdings.

An Aberdeen farmer had been at a football match in Glasgow. When he returned he was telling all about it when a friend queried: "Had they a big game?"

"Aye, the biggest I ever clubbed over," he returned.

Wm. McNevel Secret

J. D. Ames, retired marine engineer, of Houston, Texas, has turned his hobby into a money-making industry, in spite of prices and economic difficulties. Ames makes small ships and inserts them in quart bottles. He will not reveal his secret of constructing the models in the bottles, but he is able to sell all he can build.

France has 800 manufacturers of agricultural implements about twice as many as before the war.

Build Huge Telescope

Second Largest Telescope In the World To Be Erected Near Toronto

Details of the erection near Richmond Hill, north of Toronto, of the second largest telescope in the world, at an estimated cost of \$500,000, has been made public.

Officials of the University of Toronto to which Mrs. Jessie Dunlop is donating the David Dunlop Observatory in memory of her husband, announced construction would start at once on the two main buildings of the plant.

On a circular platform 800 feet above sea level a round building 61 feet in diameter will be built to house the huge telescope, nearly all parts of which are being made in England. Larger than the one in the Dominion of Government observatory, Victoria, B.C., the telescope will be on the reflecting type and will have mirrors weighing 3,000 pounds.

The telescope building and an administration building to be erected at a cost of \$150,000, will be located in the centre of a 17-acre plot, which will be known as the David Dunlop Park.

Counterfeit Coin

Spurious Fifty Cent Pieces Being Circulated At the Coast

The 50 cent piece is in a fair way to pass out of use as legal tender in Vancouver until the flood of counterfeit coins of that denomination is stopped.

A large corporation is stated by police to have taken in more than 400 worth of the spurious money, while other firms report acceptance of sums ranging from \$80 to \$250.

A number of persons detected passing the coins have been questioned by police, but in each case it was obvious they had accepted them innocently. Several months ago a spurious 50-cent piece of clever manner, bearing the date 1919, was found in circulation, and Royal Canadian Mounted Police succeeded in arresting and convicting the counterfeiter.

Within a short time, however, coins bearing the dates 1916, 1917, 1918, and of less clear design, appeared and have gained wide circulation.

Things Not Needed

Mr. Hon. Stanley Bruce would exclude from the Empire "certain foreign products." An exchange suggests that the list include German messes, Chinese puppets, Russian Reds, Spanish flies, French leeches and Dutch treats.

Only two British women, of the 200 women pilots licensed in this country, have been killed while in charge of an aeroplane, states the Royal Aero Club.

Algers and France have just been connected by radio telephone.

"Buhu," made from dates, has become the national drink of Libya.

Heat is Hard on Babies!

But Mothers Find Protection and Relief for Them in BABY'S OWN TABLETS

"When my children are overheat and refuse to warm, warm, warm, warm, I give them BABY'S OWN TABLETS at night, and in the morning they are happy and contented, and children are a pleasure to care with," writes Mrs. Mary Mann, Halifax, N.S. Mrs. George H. Walker, Thompson, N.S. writes: "I have found BABY'S OWN TABLETS the best of all children's remedies for Summer Complaint, Colic, Teething and Constipation."

"BABY'S OWN TABLETS are excellent."

Why Not Try Pool Elevators?

Alberta Pool elevators are now operating under public license and are now in a position to handle any grower's grain on the open market basis.

The excellent patronage extended to these Pool elevators during the immediate past crop year, by many growers who were never members of the Wheat Pool, is testimony to the favorable reputation enjoyed by this co-operative elevator organization.

The Alberta Pool elevators are being operated on a basis of no discrimination between customers and with the definite policy of extending fair and equal treatment to all persons using its facilities. Why not give the Pool elevator a trial?

Arrangements can be made to pool any portion of a member's wheat that he may desire. Information regarding this can be furnished by your Pool agent.
